

## Ruler Compasses

By Hilda Phoebe Hudson

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.4in. x 7.2in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 edition. Excerpt: . . . as in fig. 25. Then P LMP A P BCP D PBCP PM LP P LMP, so that PP belong to the involution determined by the pairs LL, MM. This is a projective property, and is therefore true of the range cut out on a transversal by the sides of a quadrangle and any conic through the four vertices; hence all such conics cut the transversal in pairs of conjugate points of the same involution determined by the pairs of opposite sides. But these pairs of sides are themselves particular, degenerate cases of conics through the four points, so the theorem can be stated in the simple and general form: Conics through four fixed points cut any transversal in involution. Hence if five points ABODE on a conic are given, the other point of intersection X of any straight line EX through one of the...
